Electropaedia History of Science, Technology and Leonardo’s “telescope” and “calculating machine” are examples of uninformed speculation from tantalising sketches made, without corresponding explanations in his notes. Such speculation is based on the reasoning that, if one of his sketches or drawings "looks like" some more recent device or mechanism, then it “must be” or actually “is” an early example of such a device.

Designing Microservices Platforms with NATS: A modern
Even better, rather than shift from project to project for examples, one healthcare example from beginning to end. Explanations of the principles of law were accurate. Consequently, it offers a solid foundational education for a survey course. However, the text was published in 2012; instructors will need to supplement the course with current case law / statutes. The efficacy of this course could be maintained by an instructor's assignment to investigate a contemporary state statute or by ...

Interbank lending market - Wikipedia
The interbank lending market is a market in which banks lend funds to one another for a specified term. Most interbank loans are for maturities of one week or less, the majority being over day. Such loans are made at the interbank rate (also called the overnight rate if the term of the loan is overnight). A sharp decline in transaction volume in this market was a major ...
